Thermocable SVK-165 (Thermo). Thermocable SVK-165 (Thermo) 1,5m (165cm), (Thermo) 8m

Thermocable SVK-165 is a self-heating cable used for heating. It consists of a metal sheath containing a heating element and a thermocouple. The cable is designed for use in various applications, including heating of floors, walls, and pipes. The cable is available in two lengths: 1.5m and 8m. The 1.5m cable is suitable for heating a small area, while the 8m cable is suitable for heating a larger area. The cable is easy to install and use. It is a reliable and efficient heating solution.
